## KEY FINDINGS | RESPONSE & TRANSFER MODALITY

CERF-funded partners reached about **30,000 households** with multi-purpose cash transfer in **3 regions (Somali, SNNP, and Oromia)**.

The post-distribution monitoring (PDM) exercise carried out by the CERF implementing partners show that over 1,100 households were interviewed across the 3 regions of the CERF response, with average of **43% men** and **57% female respondent**.

- The PDM survey interagency analysis for CERF-funded Multi-Purpose Cash (MPC) partners highlighted the following finding related to MPC response and transfers modality.
- 100% of all beneficiaries indicated being satisfied with the transfer modality** adopted by several CERF-funded partners.
- Beneficiaries indicated receiving an average of **8,992 Ethiopian birr** from CERF-funded humanitarian partners. Across all CERF PDM activities, an average of **86% of beneficiaries reported being satisfied with the amount received** from CERF-funded MPC partners. 2% of beneficiaries were partially satisfied while **12% were not satisfied**.
- Beneficiary respondents indicated that **targeting processes were coordinated mainly by Aid agency project staff (72%), and by Kebele chairmen/local authorities (56%),** while 15% of respondents indicated that targeting committees, and community committees (8%) were set up to coordinate targeting MPC.
- The **MPC response selection criteria** for MPC partners were focused on **households with livestock assets fully lost (50%), female-headed households affected by disaster (30%),** and households with their farmland fully destroyed (30%). Other consideration included family with disability, and vulnerable large households with more than 4 and above members.
- 25% of beneficiary respondent indicated that households met all their basic needs due from MPC received, 70% of MPC beneficiaries reported meeting some or many of their basic needs.
