

Dear Colleagues,

The IOM Weekly Crisis Update tool is meant to provide an inventory of reporting crisis updates from regional offices (RO) and Country Offices (CO) across all countries/missions.

Definition of Crisis:

An event or series of events that represents a critical threat to the health, safety, security, or well-being of a community or other large group of people, usually over a wider area (UNISDR, 2009).

Definition of Disaster:

A serious disruption of the functioning of a community or a society at any scale due to hazardous events interacting with conditions of exposure, vulnerability and capacity, leading to one or more of the following: human, material, economic and environmental losses and impacts.

Our Understanding of "*Impact* on IOM Programmes"

By assessing crisis "impact on IOM programmes", PRD wants to measure the country offices self-assessed "**level of impact**" of a reported crisis/disaster on IOM activities in terms of knowing:

- a. If the reported event threatens IOM ability to deliver on its mandate in the country/region.
- d. If reported event requires dedication of additional resources/funding to meet for unplanned Staff and humanitarian needs.
- c. If reported event poses new direct higher risk on IOM staff.

4-Week Trend (Filter By Country)

Country/Mission	WeekID	Sitrep Week	Crisis Update Description	Impact Matrix
Afghanistan	23	July 07 - July 13	- A newly published Oxfam publication has highlighted the significant and growing issue of famine in Afghanistan, with the impact of COVID compounding existing vulnerabilities and a fragile economy. The number of people on the brink of famine in Afghanistan has risen sharply from 2.5 million in September 2019 to 3.5 million in May 2020. In addition, an estimated 35 million people – a staggering 93% of households – were in immediate need of emergency assistance at the end of June, as 70% of households reported decreased incomes and interrupted remittance flows. - Border closures have also taken their toll on the supply routes for food and other essentials, causing abrupt increases in prices. For instance, the average price of cooking oil increased by 37%, the price of wheat flour by 18%, and the price of sugar by 19% between mid-March and	High
Afghanistan	18	June 02 - June 08	- Against the background of continuing concerns about migrant abuse in Iran, Afghanistan has called for a probe into the shooting death of three of its citizens in Iran, four weeks after the alleged drowning of 23 Afghan migrants by Iranian border guards. In a statement, the Afghan Foreign Ministry said it is closely monitoring, investigating, and evaluating the	High
